

Supervision of Professional Staff

GCM

The primary purpose of teacher supervision will be the development of staff and the improvement of teaching. Supervision will be an on-going program, important to beginning teachers, but equally important for teachers with experience.

Supervisory procedures will be designed to help teachers define their areas of greatest strength as well as the areas in which improvement is needed. Plans will be made to capitalize on these strengths. Procedures will be developed to help them improve in areas where help is needed. At later conferences, progress will be noted and plans for further improvement will be made.
