Child**

AT-SCHOOL TELEHEALTH

We are excited to present you with a **safe, convenient, and cost-effective** way for your child to “visit” a provider at Pawhuska Family Medical Clinic when feeling ill.

SAFE

Your child will remain at school with a licensed professional nurse who will facilitate the connection between the clinic and your student. Using new technology, and **under the instruction of a provider at the clinic, the nurse will perform an examination of your child.** Using the data provided through the video call, the provider will ascertain illness and determine the best method of care, including prescriptions if needed.

CONVENIENT

In lieu of leaving work, coming to pick up your child, making an appointment with your local physician, and taking them for a visit, **we can facilitate a telehealth visit while your child is still at school.** You will be kept apprised of diagnoses and care plans, only needing to check your student out if they require additional examination or is deemed contagious to other students.

COST EFFECTIVE

Our at-school telehealth appointments are **comparable to other telehealth services and usually cost-effective.**

Telehealth visits are subject to copays and deductibles as required by your insurance plan.

Using new technology, we can perform a more thorough examination of your child during a telehealth visit. Via a telehealth call, a provider at Pawhuska Family Medical Clinic will guide an LPN through a medical exam using TytoCare technology. This allows your provider to examine:

- Ears
- Lung sounds
- Heart sounds and rate
- Throat
- Abdominal sounds
- Temperature
