

Virtual Student Eligibility Boswell Public School

Boswell Public School will no longer have a virtual option for students that are failing virtually. Although some students are succeeding and doing well in the BPS virtual program, many students are disengaged in instruction and continually neglect to complete required assignments. This outcome is unacceptable for Boswell students.

Boswell Public School has an obligation to appropriately educate its students, even in the middle of a pandemic. Boswell teachers have worked to provide the best education for both the in-class and the virtual students. It has become apparent that some students are failing to satisfy the basic requirements of this virtual program and consequently, are not receiving the benefits of a Boswell Public School education.

BPS is not taking away virtual learning. The school will still offer virtual learning to those students that are applying themselves and having success with this model of instructional delivery. Virtual learning will also be available to those students that demonstrate a medical need to remain in remote instruction. The District will consider and approve those requests as necessary.

This decision is made with the best interests of our students, teachers, and school community in mind. We do not want to see any student fail and have to repeat a class. We appreciate the understanding of everyone affected by this change.
