

Help spread the word...

Today we are beginning a new “pick up” procedure at the middle/elementary school campus. This is for pick up ONLY. The goal is to minimize traffic on 2194 while maintaining a safe process for car riders. Pick up will still be in the back of the school.

Entering the parking lot we will still maintain a single line. After turning left we will begin with two lines. The lead vehicle in both lines will stop after passing the middle school doors. Drivers need to place their vehicle in PARK. Staff will load both lines of cars. ALL cars will need to sit in PARK until a set number of cars are loaded and drivers are instructed to pull forward. Once you have your child and you have received the thumbs up to proceed forward, all vehicles will need to merge back into a single line to approach the exit.

Please please please be patient. We will have twice the staff assisting the kids to their cars. Understand from your drivers seat you may not be able to see smaller children. Do not move until you have received the thumbs up. There will be someone walking between lanes to make sure no kids are between cars. When you are stopped PLEASE keep your vehicle in PARK until instructed to pull forward. If you have any questions, post them right here so everyone can read the answers. Y'all have a great weekend!
