

2021-2022 Fort Cobb-Broxtton School Return to School Plan

Background: During the spring of 2020, COVID-19 broke out in the United States and in Oklahoma. This virus is easily transmitted from person to person, and in response the OSDE closed schools for the remainder of the school term. During this time of closure, districts were to maintain contact with their students via distance learning. We are now in the planning phase for the reintroduction of onsite and offsite school for school year 2021-2022.

Introduction: In preparation for the implementation of the 2020-2021 school year, it will be necessary to look at multiple facets of the school environment. The first area of consideration will be school operations, followed by academics, family, and school personnel. FC-B School District will consult with the Caddo County Health Department and other health officials in all phases of planning.

Communication: To facilitate efficient communication with our FC-B Family, we will utilize a dedicated section of our district website for COVID-19 related announcements (www.fcbmustangs.com). The FC-B One Call system will be used to immediately communicate information related to school status and condition. Additionally, various social media outlets will be utilized for information dissemination as well.

Potential School Closures: FC-B School District shall work alongside local health authorities to determine school closures due to COVID-19. Closures may be short-term, mid-term or long-term. Each closure will facilitate a different educational plan. Continued distance learning will be implemented during mid-term and long-term closures. Closures may be district-wide, site-based, or by classroom according to each case with guidance attained from the local health authorities.

School Operations: When discussing school operations, we must look at the context of the delivery methods to make decisions that will be appropriate and in the best interest of our students and their safety. FC-B School District will offer the potential for two distinct delivery methods in order to best serve our students educational needs. FC-B will have one designated day per month in the calendar set aside as a virtual day so that we will be prepared in case of short or long term school closure.

Distance Learning-This delivery model will be the least facility operationally taxing, as the students will be learning via guided activities and software on their own offsite. Students may be utilizing one or all these delivery methods during the FY22 school year depending on the circumstances with COVID-19. Extra-curricular activities will not be available if student is considered full time virtual unless approved through our extra-curricular guidelines.

Onsite Instruction- This delivery model will be the traditional set for which our students are educated. This model will require the most thought in the school operations category, and it will sustain the most physical contact from students and staff. When discussing onsite instruction, the primary focus will be student safety from the current pandemic with COVID-19. Since the primary source of transmission of this virus is person to person, many modifications to onsite school procedures must be made.

2021-2022 Fort Cobb-Broxtton School Return to School Plan

Academics- Onsite learning will utilize a standard academic plan of direct instruction and interaction. Students will utilize a variety of academic materials to enable further understanding of topics and concepts taught. By offering in person and remote learning for our students we will continue to focus on strong relationships and instruction along with our expectation of deeper learning. Distance learning may be asynchronous (student and teacher not online at same time) or synchronous (student and teacher are online at the same time). Our primary learning management software will be Google classroom. It is within this general management system that all our online learning activities will be communicated. A variety of additional resources will be incorporated to enhance our digital program. It is likely that our onsite students will have distance learning as well during the school year due to COVID-19.

Attendance: Students receiving onsite instruction will have attendance taken daily per district policy. Students receiving distance learning instruction will have attendance based on connection with their teacher each day. Due to the likely nature of school closures due to COVID-19, attendance policies will include flexibility

Screening: Students and staff will have their temperatures taken during an initial screening upon entry to the building for school. Any individual with a temperature above 99.5 will be reassessed after a five-minute delay. If any individual tests over 99.5 both times, they will be sent home and not allowed to stay on campus. Designated isolation areas will be identified in each building for students who exhibit symptoms during the day or are running a temperature above 99.5. They will remain in this area until a guardian has picked them up from the school. Any student who is sent home due to fever will not be allowed back in school until one of the following: **1)** negative COVID-19 test and 48 hours fever free without medication **2)** must be 72 hours fever free without medication, have no other symptoms and must not have been exposed to COVID-19. **3)** 14 days fever free with no medication and no symptoms if exposed to COVID-19.

Positive Test Protocol: Fort Cobb-Broxtton School will collaborate with local health officials (Caddo County Health Dept.) in taking the proper protocols of contact tracing and quarantining. If a student is under quarantine they can return to school on day 8 after last exposure with a negative test or day 11 of quarantining if they are not experiencing any signs or symptoms. They must also have to have quarantined away from the individual who tested positive. If a student or staff member test positive they can return to school on day 11 after positive test if they are symptom free.

Vaccine Clinics: Fort Cobb-Broxtton School will work with the Caddo County Health Dept. and other local health officials to set up vaccine clinics on campus. Our school will allow anyone from our school or community to come on to campus and receive the vaccine shot.

Social Spacing: Measured six-foot markings will designate spacing in common areas to aid in social distancing. Routes in the hallways will be marked with spacing as well as in the cafeterias, libraries and shelter areas. Changes in the classrooms for distancing may include: reduced desk capacity, spacing and orientation of desks to all face forward, common materials moved out for additional space, etc. If a classroom cannot social distance, students will be placed in pods throughout the classroom.

2021-2022 Fort Cobb-Broxtton School Return to School Plan

Masks: Students and Staff will be encouraged to wear a mask whenever social distancing cannot be achieved in the building. Teachers should wear a mask whenever they are within 6 feet of a student for more than 10 minutes.

- [Wash your hands](#) or use hand sanitizer before putting on your mask.
- Put the mask over your nose and mouth and secure it under your chin.
- Fit the mask snugly against the sides of your face, slipping the loops over your ears or tying the strings behind your head.
- If you have to continually adjust your mask, it doesn't fit properly, and you might need to find a different mask type or brand.
- Make sure you can breathe easily.

Sanitization: Shared items will either be removed or sanitized between each use. Staff will clean the desk areas and commonly touched surfaces multiple times throughout the day. Students will be encouraged to use the water bottle fill stations instead of conventional drinking fountains. Teachers throughout the day will require students to wash hands for 20 seconds with soap and water. After the instructional day ends, all areas will be sanitized and cleaned thoroughly for the next day. Electrostatic sprayers will be used in the evening to disinfect building areas.

- Choose hand sanitizers that contain at least 60% alcohol.
- Avoid alcohol-based hand sanitizers that are not approved by [Food and Drug Administration \(FDA\)external icon](#).
- Properly apply alcohol-based sanitizer by rubbing the gel over all surfaces of your hands and fingers until your hands are dry.
- Swallowing alcohol-based hand sanitizers can cause alcohol poisoning. Keep them out of reach of young children and supervise their use.

Visitors: For the safety and health of our students, visitors will be restricted. All visitors will be screened prior to being allowed access to the hallways or the building, if deemed necessary. If a visitor is dropping off an item, they will be allowed in the office only for a period of ten minutes or less. If they cannot socially distance, a mask will be provided to the visitor prior to accessing the building.

Student Services: In either an onsite or distance learning environment, student services will continue to support the needs of our students. Counselors and other special service personnel will be available for both onsite and distance learning time periods of our school year. Due to the uniqueness of the school year with COVID-19, the district's crisis team will play an active role as the year progresses. We will continue to address the needs of the social emotional well-being of our students both onsite and distance learning. Staff will continue to research best practice for supporting our students during this stressful time period.

Athletics: FC-B Schools will follow the guidance of the OSSAA and our local health departments while supporting our students in their athletic and activity programs. These programs will be available as

2021-2022 Fort Cobb-Broxtton School Return to School Plan

allowed by our current status with COVID-19. Athletics will not be available for distance learners unless approved through our extra-curricular guidelines.

Child Nutrition: We will continue to provide child nutrition services for our onsite students. In the event of district closure for medium to long terms, we will provide grab and go lunches similar to what was provided during the 2020-2021 school year.

Transportation: FC-B will continue transportation services during the 2021-2022 school year; however, due to the insurmountable difficulty in social distancing on a school bus, it will be up to the parent and student as to whether they wish to take the risk of COVID-19 exposure to ride the bus. We will sanitize the buses in between each route and each evening in preparation for transportation. When possible, all windows will be opened to allow for airflow through the bus. At this time, we are asking parents to transport their children to and from school. Anyone riding the bus will be required to wear a mask.

School Personnel: Each school personnel will receive a mask and will be encouraged to wear them; other PPE will be provided as needed. School personnel will be expected to observe social distancing rules to the extent possible, and to wear PPE when distancing is not possible. When/if the district must close due to COVID-19, teachers will report to their buildings to implement the continuation of learning through our distance instructional plan unless health agency guidance is to the contrary.

Summary: The return to learn plan must be a fluid framework to allow flexibility when addressing unknown circumstances that will arrive during the 2021-2022 school year. Specific situational guidance will be issued through our One Call and website communication methods. We will continue to update our website with current information relative to our educational programs and the status with COVID-19. In the event of a school closure and transition to distance learning, teachers will use Google Classroom as an additional means to communicate directly with students and parents.
